

COVID-19 VACCINE

Distribution & Direct Vaccination Operations Support

Immunization with a safe and effective COVID-19 vaccine is a critical component of the United States' strategy to reduce COVID-19-related illnesses, hospitalizations, and deaths, and to help restore societal functioning.

However, as we have seen with past public health scares (SARS, H1N1), carrying out a mass vaccination strategy successfully is often a difficult process. Failure to run an efficient operation can have significant negative effects on the community, including slow distribution, resource waste, increases in operation duration, and service gaps (requiring additional resources later). Further, lack of jurisdictional vaccination coordination leads to bad press, duplication of efforts, and credibility issues within the operation.

How Do We Ensure Program Success?

A vaccination program can only be successful when it has the necessary resources, support, coordination, and expertise behind it. A program must be all-inclusive, and address the following:

PLANNING

ASSESSMENT

TRAINING

OPERATIONS

COMMAND

AFTER-ACTION REVIEW

**At ISC we have the resources and expertise
to assist you in all facets of your Mass Vaccination efforts.**

By leveraging our recent experience working within the Public Health and Medical Sector supporting COVID-19 Operations for state, directly funded cities, and large urban counties we can ensure you have the resources and guidance you need to run a successful Mass Vaccination program.

ABOUT US

INTEGRATED SOLUTIONS
CONSULTING

ISC is a professional services firm focused on developing and implementing comprehensive crisis and consequence management solutions. We are a team of innovative problem solvers that combine experience and evidence-based knowledge to deliver practical, best practice results across multiple industries to make communities safer and more resilient.

ISC Delivers Unparalleled Experience in Public Health and Vaccine Operations

STATE OF ILLINOIS, GREATER CHICAGO REGION

ISC provided support to the Chicago Department of Public Health in their responses to COVID-19 and H1N1, analyzing existing plans, conducting gap analysis and AAR/IPs, along with supporting Emergency Operations Center and providing in-person and virtual staff to assist in the Incident Command System.

FLORIDA

ISC conducted site evaluations for the City of Miami to identify potential sites to conduct Point-of-Dispensing (POD) for vaccinations that were expected to be released in late 2020. Once released, ISC provided technical support-services for Palm Beach County and other south Florida municipalities POD activities including on site management, logistic coordination, and situational reporting for over 750,000 vaccinated residents.

STATE OF OHIO

ISC conducted an AAR/IP of the state's COVID-19 pandemic response and incorporated them into a state-wide COVID-19 Operations Strategic Plan, along with creating Hamilton County's COVID-19 Re-opening Strategic Plan.

VARIOUS SCHOOL DISTRICTS

ISC is supporting several school districts and universities to help keep schools open in the midst of the COVID-19 pandemic. ISC is assisting with logistics; facilitating discussions with teachers, parents, staff, and the community, monitoring progress; and assisting in safety measures. We're also identifying costs eligible for FEMA Public Assistance funding and cost recovery procedures.

TEXAS

ISC developed and exercised a regional communicable disease response plan for Dallas during the Ebola outbreak in 2014. ISC developed an adaptive recovery plan for San Antonio that details strategies for the City to minimize disease spread and mitigate the impact of COVID-19 while maintaining other necessary emergency management functions. ISC is also working with Corpus Christi to secure millions of dollars in eligible FEMA Public Assistance funding.

Previous Pandemic Experience

H1N1

In 2009 ISC led a mass vaccination campaign for the Chicago Dept. of Public Health, staffing the Public Health Emergency Operations Center, Dispensing and Vaccination Centers, and Receipt, Storage, and Staging sites.

Ebola

In 2014 ISC developed a regional coordination strategy for High Consequence Infectious Diseases for Dallas. ISC also conducted Ebola AARs and HSEEP exercises for Chicago, Dallas, and Cincinnati.

Zika

In 2016, ISC developed guides, delivered training, and conducted exercises on Point of Dispensing operations for Chicago, Phoenix, Kansas City, and Miami.

COVID-19 COST RECOVERY

ISC is supporting numerous counties, municipalities, hospitals, universities and schools across the Nation to provide technical assistance in identifying COVID-19 eligible costs for FEMA Public Assistance. ISC has identified and secured over \$20 million dollars in eligible FEMA Public Assistance for COVID-19.
